

## PPF Peruvian Buster

[view Histogram](#) | [ARI #](#)

### Vital Statistics

<b>Sex:</b> Male	<b>Color:</b> Medium Fawn
<b>Status:</b> Unproven	
<b>Birthdate:</b> 9/5/2007	<b>Dam:</b> MFI Peruvian Fawna
<b>Heritage:</b> Full Peruvian ¾ Accoyo	<b>Sire:</b> PHA Accoyo Bentley

Full Peruvian, ¾ Accoyo, Buster is a product of two **multi-Champion parents**, 'PHA Accoyo Bentley' and 'MFI Peruvian Fawna'. While also sporting the names of PCA Accoyo El Nino, Accoyo Dracula, and Accoyo Caligula, Buster brings these legendary genetics into the fawn gene pool. Buster is the total package. His fleece is a beautiful, tightly crimped medium fawn that is extremely fine ('10 micron count of 17.9), dense, and full of luster. We can't wait to see what he produces!

In terms of his personality, Buster is mellow and took on the role of "Big Brother" to our junior herdsire Prius during weaning. We've been so impressed with how loving and caring Buster has been with him.

Price: \$25,000
